

ARDENT

GREAT CAREER OPPORTUNITY – MARINE & OFFSHORE SERVICES

Project Manager – location Ijmuiden, The Netherlands

Ardent is an industry leader within marine services. Our European offices are based in Ijmuiden, NL. Building on the heritage of two respected salvage companies, Titan and Svitzer Salvage, our service offering covers risk mitigation, emergency response, wreck removal, offshore decommissioning and other marine services.

The Project Manager plays a critical role in the Ardent operational pillar – Projects. The Project Manager is primarily responsible for delivering quality solutions to customers through the management of wreck removal, decommissioning, and other subsea projects. The Project Manager will review the project proposal, develop and implement controls to manage program risks, communicate project status to stakeholders, and proactively review and monitor the execution of contractual aspects of the project. Additionally, the Project Manager will manage the development, negotiation, and implementation of bids, contract proposals, and RFP's with customers, subcontractors, and vendors. We set the bar high for our team to provide best in class solutions to our clients and other stakeholders.

For the right candidate, this position offers the opportunity to work across a number of disciplines and areas on a multinational team. This position plays a critical role both in the office and in the field, providing innovative solutions to our clients and ensuring the safe completion of operations in the field.

For the right person who can be an effective team leader the job offers a great learning experience and growth opportunities.

Specific Areas of Responsibility

- Manage the development, negotiation and implementation of bids, contract proposals and/or request of (RFPs) with customers, subcontractors and vendors.
- Manage the planning, scope, scheduling, design, budget, resource allocation and risk analysis of current and potential projects.
- Review project proposals and help determine the time frame and procedures for accomplishing the project, staff requirements and allotment of available resources to various phases of project.
- Develop, track and implement controls to manage projects and organizational risk.
- Communicate project status to key stakeholders.
- Coordinate and may supervise the activities of on-site project personnel to ensure a designated project progresses on schedule and within budget parameters.
- Contribute to the continual enhancement of project management methodology.
- Supervise project management team(s) consisting of employees, contractors and/or subcontractors and freelancers including performance management responsibilities.
- Confer with other project personnel to provide technical advice and to resolve problems

Required/Preferred Education

- Technical Highschool or Technical University degree related to the industry (i.e. Civil Engineering / Mechanical Engineering) or equivalent (additional graduate level training in finance such as MSF or MBA degrees, or are qualified accountants an advantage)
- Offshore and/or Maritime and experience required

ARDENT

- Decommissioning and subsea services experience strongly preferred

Training and competencies

- Advanced proficiency with Microsoft Excel, Outlook and Word.
- Advanced proficiency with Oracle Primavera P6 or similar PM system
- Ability to communicate effectively verbally and in writing and to establish and maintain effective working relationships.
- Industry experience
- Analytical skills and strong numerical skills
- Experience with Microsoft Excel is a must
- Strong collaboration, and networking skills
